

Wiring:

- 1 - Connect to existing reversing light circuit.
- 2 - Connect to existing rear fog light circuit.
- 3 - Connect to Trailer roadlight ground / Neutral
- 4 - Feed to scene / working lights
- 5 - Supply from scene / working lights power source.

Operation:

The scene / working lights will only operate if the **TWO** following conditions are met: 1 Vehicle is in reverse and reversing lights are on, 2 Vehicle rear fog lights are turned on.

This will allow vehicle to remain unmodified.
